BRITS BRING CLEANTECH, CARS & STARS TO BRITISH COLUMBIA

EVERYTHING ELECTRIC CANADA

We're back! How has it only been a year? The rapturous reception we received last September is still ringing in our ears, and this time we're expecting the show to be even better, bigger, and if you bring your friends and family, busier too! But what have a bunch of Brits got to brag about? After all British Columbia is beating Great Britain hands down with 1 in 4 new car purchases being battery electric and copious clean energy to power them with, Vancouver could even be the next Oslo. And yet, we've been around the block a bit, and we've seen that growth isn't always linear, and that economics, politics and misinformation can be the biggest trip hazards when it comes to making 'everything electric'. We've learnt that the transition to sustainable energy is not a done deal, and that's why the climate emergency demands urgency. And even if the climate and clean air are not your core concern, we've got great news, the technologies we've curated at Everything Electric CANADA are simply better than what's been before. Anyway, enough eulogising, what a show we've got for you!

Some think that the cars are the stars, and for those guests, we have *almost* 'Everything Electric, including a world-beating line-up of car companies, numerous EVs you're unlikely to have seen before, and we think the biggest ever all-electric test drive program held in North America. And it's 'electric vehicles of all shapes and sizes' so we have everything from bikes and boards to pick-ups and big rigs for you to check out. We've also got an array of clean energy solutions and experts to help you navigate your way from fossil fuels to fossil free, and thanks to BC Hydro we have an Ask the Expert area to, so you can discuss your personal requirements with the best in the business. We cater for commercial and business attendees on the Friday, and then for families with children on the Saturday and Sunday, so whether you're a big kid with big responsibilities, or a little kid with aspirations for a better world, you won't find an expo with more positive energy anywhere on the planet.

We hope you enjoy all the visitor attractions laid on for you:

- GIGA Theatre
- MEGA Theatre
- EV Test Drive Experience
- Energy Advice Zone
- Micro Mobility Test Track
- Commercial Vehicle Zone
- Science World kids shows

And then of course there's the two stages, where stars of YouTube lead entertaining and educational discussions with dozens of experts across an amazing mixture of important topics. Of course we have the familiar faces of **Fully Charged SHOW**, including founder Robert Llewellyn, allied to the incredible talents of several other top class YouTubers; Ricky Roy, of Two Bit Da Vinci (& sometimes **Fully Charged**), the Transport Evolved team, Matt Ferrell from Undecided, and Sandy Munro from Munro Live to name a few. This is our 16th expo worldwide, and we are inching closer to perfecting the format, but we hope to have created a feelgood, family-friendly festival of electrification that you'd like to spend more than a single day at, and that you will visit year on year.

Finally, we would like to offer our sincere thanks to you, our attendees, the people that make this exhibition a reality, to our exhibitors, to our sponsors Siemens, elywhere, OpenRoad Group, 7Gen, On The Run EV Fast Charge and of course to our partners, BC Hydro who inspired this show to choose British Columbia. And now, we've found a home here, we are delighted to say that this expo will be an annual fixture in the Vancouver calendar. Thanks again for your support, enjoy the show, and the breathtaking backdrop.

EVERYTHING ELECTRIC?

We make it our mission to get 'almost' everything electric to our shows, and our Vancouver show is no exception. There are so many cars at this show, and as we add vehicles into the final few days, it's impossible to list them all. Keep your eyes peeled for the weird and the wonderful, and if you arrive early enough enjoy the test drive options too!
